5 Ways to Boost Morale at Work During Wintertime. As winter sets in and most people are looking forward to warm weather again, they are also feeling more sluggish at work. But there are some things you can do to maintain your productivity during these cold months that will help boost morale for people of all ages. Read more ... 2/20/2015 The Death of Manly Men? The Death of Manly Men? By Tom Wolfe.I've been doing some thinking about this whole manliness thing, after being interviewed for a magazine story that I thought was going to be about my new book, "Back to Blood"--but which turned into something else after the reporter did some research on me. It seems he got hold of an article I wrote for GQ magazine in the 1980s called "A Man in Fall," which apparently was the first time I had ever used the manliness word in print or anywhere else. And it's true, although it's come up all over the place ever since. It's obvious that if you're writing about manliness in the 1980s in America, you have to talk about the loss of it among men, especially young men. The reporter made that point in his article, which landed on the cover of New York magazine last month with this headline: "The End Of Manly Men." The article was based on an interview with me, plus what he called "an informal survey" -- which I'm guessing meant an online survey. He sent out a bunch of questions to all kinds of people -- politicians, actors, sports figures, even people off the street who happened to be walking by when he was interviewing me in Washington Square Park in New York City -- and got responses from all over. The results of his survey were a little surprising to him. He said he had been expecting women to be the ones who most agreed with the notion that men have become soft and emasculated, but most of the responses came from men, not from women. In fact, more than half of the respondents disagreed with that notion -- they didn't see a decline in manliness among men or a crisis in male identity. There were some interesting things in the article that I'd like to mention here. The reporters asked questions about stuff they thought was important to consider when talking about manliness -- whether or not a guy was "a good person," how he dealt with his emotions and fears, whether he was a "techie," etc. Then he goes through some confusing statistics about income and class in America -- apparently a lot of the people who responded to his survey were people with a message-sending income, in the millions. He's talking about people like me -- I make a pretty good living doing what I do, but still think of myself as a working-class guy from Baltimore, and not somebody with an "infinite" income.
